Summary

Data Analyst with a sales background and hands-on experience in SQL, Python, Power BI, and Excel. At Quill, built a call-time dashboard, improving individual efficiency by 33%. Has since developed portfolio projects spanning Monte Carlo modeling, CMS healthcare data analysis, and ETL pipelines in Databricks on AWS. Translates business data into KPI reporting that supports performance tracking, sales strategy, and decision-making.

Projects

- Relocation Feasibility Analysis** (Python, Polars, Huds Data) 2026
Built a Python budget model using IRS tax and HUD rent data to evaluate job relocation offers for financial feasibility
- Rent Responsibly** (Python, SQLite, GeoPandas, RentCast API, Mapbox API, fueleconomy.gov API) 2026
Upgraded the relocation model with live rental listings and Mapbox commute isochrones to screen housing by feasibility, safety, DTI
- Monte Carlo Job Offer Comparison** (Python, NumPy, Matplotlib) 2026
Developed a Python Monte Carlo analysis (50,000 trials) to model outcomes between job offers to compare compensation structures
- Clipboard Health Case Study** (Python, CMS PBJ data) 2025
Analyzed CMS staffing data across 14,000+ nursing homes using Python/ML to identify cost inefficiencies and inform Sales strategy
- Google Data Analytics Capstone Case Study** (RStudio, Divvy/Lyft Trip Data) 2025
Integrated Divvy ridership and hourly weather data in RStudio to uncover trends and boost membership enrollment
- Customer Call-Time Optimization Dashboard** (Google Sheets) 2022
Designed a dynamic operational dashboard monitoring real-time call duration data, boosting efficiency by 33%

Experience
